EDUCATION

- **Jaipur National University** — Jaipur
  Master of Computer Applications; Percentage: 68.7% — *Sep. 2017 – Oct. 2019*

- **GLA College** — Medininagar
  Bachelor of Computer Applications; Perccentage: 74.6% — *July. 2014 – Aug. 2017*

EXPERIENCE

- **Mindrops Solutions Private Limited** — NSP, New Delhi
  Software Engineer — *Dec 2022 - Present*
  - Experienced in frontend development, proficient in creating responsive **SaaS web applications, websites, components and UIs** to ensure seamless user experiences across various devices. Skilled in collaborating with design and backend teams to uphold scalable UI systems, conducting user research, and employing data visualization techniques for iterative improvements. Demonstrates expertise in enhancing SEO through meta tags, schema markup, and optimization strategies such as lazy loading, leading to accelerated load times and increased organic traffic.
  - Proficient in Angular, React, Vue.js, and other **JavaScript frameworks** for developing UIs and Components.
  - Extensive experience in developing **email templates** for diverse scenarios, including streamlining reporting processes and optimizing order communication for **e-commerce platforms**.

- **EdiQue Solutions Private Limited** — Garhwa, Jharkhand
  ICT Instructor — *Nov 2019 - Aug 2022*
  - As an ICT Instructor, I instructed advanced **web development** teaching methods, enriching the curriculum to enhance students' **coding skills** in an engaging environment. I curated diverse projects, hosted technical competitions, and provided personalized guidance, refining strategies for optimal learning outcomes and satisfaction.

PROJECTS

- **Chedular - Appointment Scheduling Application (SaaS):**
  - Developed intuitive client-side complete website and admin dashboard UI with Angular/TypeScript.
  - Expanded application reach by adding **Dutch language** (NL) support through translation for a localized and inclusive user experience.
  - Optimized frontend performance, ensuring responsiveness and resolving UI issues for a seamless user experience. Stayed updated with trends, applying best practices for robust, maintainable code.
  - Developed **responsive layouts**, adhering to mobile-first design principles for a seamless experience on desktop and mobile platforms.

- **LazyMonkey - QR Based Customer Feedback System (SaaS):**
  - Developed LazyMonkey website with user-friendly interface, visual appeal, easy navigation, and cross-platform compatibility, including a responsive dashboard UI for admin side.
  - Developed specialized **email templates** for LazyMonkey tenants and clients, as well as a concise **daily email report** template to streamline communication and deliver key insights effectively.

- **Woodcrrests - Scratchcard Reward Project (SaaS):**
  - Developed a complete front-end UI for the client-side website, ensuring an intuitive and user-friendly experience.
  - Implementation of a **scratch card** using Canvas. It allows users to reveal gift items by scratching the card.
  - Developed distinct email templates for the scratch card and mega jackpot products.

- **Static Websites:**
  - I possess experience in creating **multiple static websites** featuring contemporary UI designs.
