EDUCATION

- **Jaipur National University** — Jaipur
  Master of Computer Applications; Percentage: 68.7% — *Sep. 2017 – Oct. 2019*

- **GLA College** — Medininagar
  Bachelor of Computer Applications; Percentage: 74.6% — *July. 2014 – Aug. 2017*

EXPERIENCE

- **Adaan Digital Solutions Private Limited** — ITO, New Delhi
  Front-End Developer — *May 2024 - Present*
  - Highly motivated and detail-oriented Front-End Developer, currently crafting responsive, user-friendly, and visually appealing web applications that drive user engagement, with a success rate of 100%.

- **Mindrops Solutions Private Limited** — NSP, New Delhi
  Software Engineer — *Dec 2022 - Apr 2024*
  - Worked in Front-End development, proficient in creating responsive web applications, components, and UIs to ensure seamless user experiences across various devices. In this role, I was responsible for collaborating with design and backend teams to uphold scalable UI systems, conducting user research, and employing data visualization techniques for iterative improvements. Achieved a 99% success rate in the development process, ensuring high-quality and efficient solutions.
  - Developed reusable components and UIs using JavaScript libraries and frameworks such as React Js, Next Js, and Angular Js.
  - Extensive experience in developing email templates for diverse scenarios.

- **EdiQue Solutions Private Limited** — Garhwa, Jharkhand
  ICT Instructor — *Nov 2019 - Aug 2022*
  - As an ICT Instructor, I taught web development, enriching the curriculum to improve student's coding skills. I designed diverse projects, hosted competitions, and offered personalized guidance, enhancing learning outcomes. Achieved a 90% student success rate.

PROJECTS

- Chedular - Appointment Scheduling Application (SaaS):
  - Developed intuitive client-side complete website and admin dashboard UI with Angular/TypeScript.
  - Expanded application reach by adding Dutch language (NL) support through translation for a localized and inclusive user experience.
  - Optimized 98% Front-End performance, ensuring responsiveness and resolving UI issues for a seamless user experience. Stayed updated with trends, applying best practices for robust, maintainable code.
- LazyMonkey - QR Based Customer Feedback System (SaaS):
  - Developed LazyMonkey website with user-friendly interface, visual appeal, easy navigation, and cross-platform compatibility, including a responsive dashboard UI for admin side.
  - Developed specialized email templates for LazyMonkey tenants and clients, as well as a concise daily email report template to streamline communication and deliver key insights effectively.
- Woodcrrests - Scratchcard Reward Project (SaaS):
  - Developed a complete Front-End web application for the client side, ensuring an intuitive and user-friendly experience, and also implemented scratch cards using Canvas. It allows users to reveal gift items by scratching the card. Developed distinct email templates for the scratch card and mega jackpot products.

SKILLS

- JavaScript, React, TypeScript, Next JS, HTML, CSS, SCSS, JQuery, Tailwind CSS, Bootstrap, Git, GitHub
